

MANAGED MOBILITY SERVICES

Mobility Solutions for Clients on the Move

Managed Mobility Services from PiiComm means working with a company with a proven track record for providing services to some of North America most recognized brands who rely on us to keep their business-critical operations running everyday.

Choose PiiComm, one of the most experienced services and solutions firms in North America, when it comes to designing, deploying and supporting mobility solutions. Whether you are launching a new business initiative or are considering partnering with a firm with the skills, experience and resources to support your business growth, trust PiiComm to bring the innovation, skills and resources necessary to help you exceed your business objectives.

Solutions tailored to your needs

PiiComm will assist in defining the right solution specific to your business and user profiles, select the best technology, create custom software or integrations and plan a successful deployment with defined management processes to keep the solution running at peak efficiency throughout the product and project lifecycle.

If it moves, we support it

PiiComm supports the world's most popular smartphones and tablets for today's workforce as well as industrial rugged mobile computers for the field and warehouse worker in the most demanding environments.

Real-time insight into your inventory

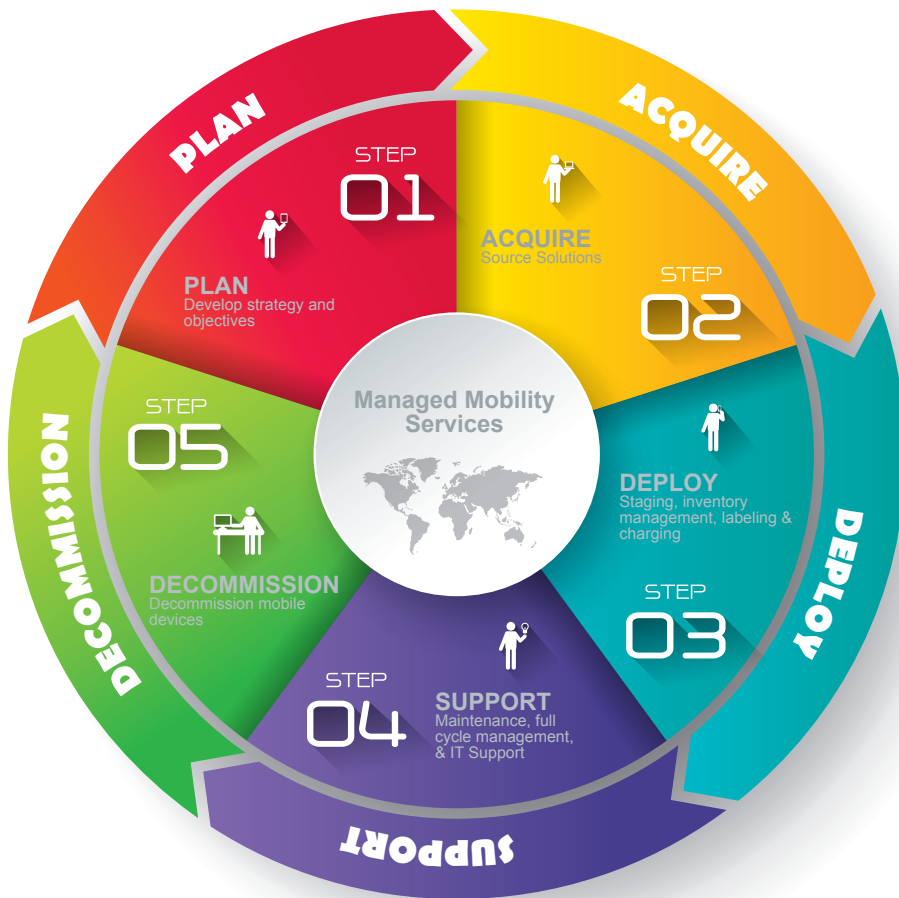

In addition to great service and live support, PiiComm provides the tools needed to effectively manage a business including an online client portal to get real-time access to inventory, performance reports, manufacturer RMA's and historical information about every mobile asset you own.

MANAGED MOBILITY SERVICES

The Managed Mobility Services program was designed to help alleviate negative effects that have to be considered throughout the lifecycle of a mobile device. By leveraging our people, processes, tools and facilities, we have the expertise to offer an affordable and value-packed asset and lifecycle management service that will help to reduce or eliminate the negative ROI impacts of device failure in the field.

Our team of project managers, application developers and technical specialists work to complement your existing IT team to ensure your mobile device users are as productive as possible. We do this by using systems, processes and purpose-built tools and facilities to manage your mobile technology and infrastructure. With many years of providing Managed Mobility Services, we've learned a few things about not just keeping our clients operational and enjoying substantial reductions in lost productivity costs, but also helping them to design, build, support and deploy a truly innovative mobility solution for profitable business growth. Ask us what we can do for you!

STEP 01 Plan
Leverage PiiComm's comprehensive planning services to assess and develop your mobility solution. We will identify a strategy to mobilize that is in line with your goals and objectives.

STEP 02 Acquire
PiiComm will manage your comprehensive procurement process. We have the expertise to source your complete mobility solution to empower your business.

STEP 03 Deploy
Utilize PiiComm for your mobility deployment strategy. We are able to streamline the implementation process and put your mobile devices into the hands of remote workers faster.

STEP 04 Support
Reduce the demands that mobility places on your existing IT team. Optimize our lifecycle approach for all your support requirements. PiiComm will manage your spares pool requirements, warranty and repair services for your mobile devices.

STEP 05 Decommission
PiiComm will securely handle your mobile devices at the end of their lifecycle. We can effectively decommission mobile devices to ensure permanent data destruction for complete peace-of-mind.
